

Phi'on products are designed to address the fundamental link between healthy soils, plants, water, animals and humans.

Agility Colloidal Silver

Colloidal silver is a powerful, natural, and nutritional support to **aid recovery from infections and viruses**. It can be taken orally to help fight off colds and flu or applied topically to improve recovery from cuts, wounds, burns, rashes, ear and eye infections and blocked sinuses.

It has been shown to significantly reduce pathogens by disabling their oxygen metabolism enzyme. Within minutes of being exposed to colloidal silver, studies have shown that the pathogen suffocates and dies and is cleared from the body via the immune, lymphatic and elimination systems.

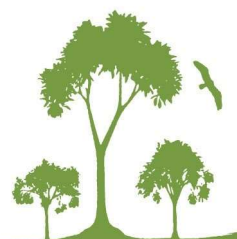

Unlike pharmaceutical antibiotics, which destroy beneficial enzymes, colloidal silver leaves these tissue-cell enzymes intact, meaning it can be safely and painlessly applied to all areas of the body.

Colloidal silver is safe for animals, reptiles, plants, and all multi-celled living matter.

The highest-grade colloidal silver is produced by the electro-colloidal or non-chemical method where the silver particles and water have been colloidized, meaning they are dispersed within and bound to each other by an electric current, leaving the super-fine silver particles suspended indefinitely in the water. Agility Colloidal Silver is made using negative charge (-mV) structured water and a configuration of pure silver rods that is unique in design to Phi'on.

Recommended Usage

Apply topically to the affected area. In the case of colds and flu, take orally (add 5ml to 250ml drinking water daily, until symptoms clear). Applied topically, it also makes an excellent underarm deodorant. This product is not to be taken continuously for extended periods beyond 4-6 weeks, at a time.
